A. Decoy support and support index
Dα (left axis) and Dα^-1/2 (right axis)
Dα
Dα^-1/2
α
First pass
Second pass
Basic
Semi-tryptic
B. Local boundary support Dα,win
Decoys with q in (α, 1.2α]
Dα,win
α
C. Threshold elasticity Sα(0.2)
List overlap: A(α) vs A(1.2α)
Jaccard overlap
α
D. Decoy-reference PEP concordance
D_b / T_b (decoy-derived reference)
Mean predicted PEP
500
1000
2000
global list
run × precursor
E. Equal-chance check
Decoy fraction by q-value band (global lists)
Decoy fraction
Mean q-value in band
F. Expected false targets
Σ PEP (accepted targets)
α
